

## Rationing Boards To Set Up Price Control Panels

The Associated Press  
 CLEVELAND, April 27.—Price control panels will be established at all rationing boards in Ohio, Michigan, Kentucky and West Virginia, so the public may help in their own interest, Executive Edward C. Welsh, regional office of the price administration declared today.

Some panels made up of four standing persons representing the particular area served by the rationing board, already have been set up in numerous sections of the five-state region and others will be established in the next two weeks, the regional OPA price executive added.

"On the principle that the majority of the people do not want inflation and that they are willing to pitch in and fight it, the OPA has made provision through the institution of these panels for the people to contribute their time and energies in keeping prices down," Welsh said.

Responsibilities of the panels will include informing retailers of developments in price regulations, receiving and investigating complaints of violations and informing the OPA of community problems.

"This community front against inflation will not be a policing organization," Welsh emphasized, adding "it will not be set up to snoop or annoy merchants who are attempting to do business under the inconvenience of price control."

Panel members are being educated in their jobs through district meetings, the price executive reported.

## MARION GETS GUN EXHIBITS

State Collectors Association To Hold Annual Meeting Here in May.

The annual meeting of the Ohio Gun Collectors Association will be held at the Harding hotel in Marion May 15 and 16.

The meeting will be under auspices of the Marion Hobby club in cooperation with the state association of which William H. Pufford Jr. of Lima is president.

About 50 gun displays are expected. This number is about half the exhibits shown in former years.

Transportation and general war shortage difficulties are mainly responsible for the decrease in displays.

The collectors will meet in the hotel ballroom and mezzanine floor. The displays will be open to the general public, no admission being charged.

There will also be no registration fee for collectors wishing to enter displays. The exhibits will be closed during the church hours on Sunday morning, May 16, but will reopen around noon.

Terry W. Brown of Canton, association secretary, has sent notices to all members concerning the time and place of the 1943 meeting. Last year the collectors met in Cincinnati but this year because of transportation problems association members chose Marion, a more centrally located city.

Mr. Brown expects gun enthusiasts from New York, Pennsylvania, Michigan, West Virginia, and Ohio to enter displays.

About nine displays are anticipated from Marion county, with five coming from the city of Marion itself. Dr. N. E. Rickey of Prospect is vice president of the OGCA and is expected to have one of the leading displays.

Dr. F. A. Stengel, of Marion, an OGCA member for many years and secretary of the Marion Hobby club, will also enter an exhibit that promises to be a blue ribbon contender. Prizes will be awarded for the best displays.

Marion county benefited to the extent of \$364.24 in the "March of Dimes" staged in theaters throughout the country in the interest of the Foundation for Infantile Paralysis, according to a report made by P. J. Wood of Columbus, state chairman of the drive conducted the week of Feb. 18 to 24. A check for this amount has been sent to James G. Lytle, county chairman, the report states.

Ohio movie patrons contributed \$115,296.05 to the theater drive the report states. Half of this amount is being sent to the National Foundation for Infantile Paralysis and the other half returned to the counties in which theater collections were taken. It will be used for the fight against paralysis in those communities.

Cooperating in the drive here were the Palace, Ohio, State and Marion theaters.

"C" Gas Cards Made Available to Salesmen

WASHINGTON, April 27.—OPA yesterday made thousands of salesmen and others outside of the east eligible for C gasoline rations up to 720 miles a month, a maximum increase of 250 miles a month.

The new provision gives all kinds of salesmen, newspapermen, photographers and any other people who drive "in the course of work" the same eligibility for a maximum gasoline ration of 720 miles a month that was given in January to "essential salesmen" outside of the east.

Officials said the new ruling did not affect rations for driving to and from work, which are regulated by different provisions. The new rule applies to persons who drive cars while at work.

OPA said it had been enabled to increase these gas rations through an increase in the tire quotas from Rubber Director William M. Jeffers.

NEW CARRIER LAUNCHED

NEWPORT NEWS, Va., April 27.—The Intrepid, third giant aircraft carrier built at the Newport News Shipbuilding and Dry Dock Co. plant since Pearl Harbor, was christened here today.

Vigorous Health Rich Red Blood

The facts are simple because of all the conditions affecting the human body a "low blood count" is the most deceptive.

If you feel run down, poor appetite, have lost weight—chances are if you restore these precious red-blood cells back to normal your troubles will be over.

In Nuco-Ferrin you go after the trouble in two ways. First you increase the appetite and better your stomach digestion in order to get more food out of the food you do eat.

Secondly, thin, weak, watery blood is made rich and red again thus giving you the vigor and vitality you need for a healthful and happy life. Try Nuco-Ferrin today on a money-back guarantee. The big \$2 bottle sells for only \$1.29.

## PROSPECT NATIVE KILLED IN ACTION

Lt. David R. Everett Dies in North Africa Battle Zone.

Word has been received here of the death of Lt. David R. Everett of Fullerton, Calif., native of Marion county, in action in northwest Africa.

He was a pilot with the U. S. Army Air Force there.

His parents, Mr. and Mrs. Vernon M. Everett of Fullerton, received the word last week from the foreign Red Cross, having been notified Dec. 14 by the U. S. war department that Lt. Everett was later awarded the oak leaf.

He was reported missing in action Dec. 3. He was one of a group of four pilots, two of whom have been accounted for since, who were attacking a battle at that time.

Lt. Everett was born in Prospect July 4, 1920, to Vernon M. Everett and Mammie (Lundy) Everett. The family moved to California shortly after his birth. He was graduated from the Fullerton Union High school in 1937 and held a diploma from Fullerton Junior college. His flight training was received at an Aero Academy at Ontario, Calif., and he won his wings at Stockton, Calif.

Following the service in February of 1941, he received his commission in September of that year. In May last year he left for active duty and S. war department that Lt. Everett was later awarded the oak leaf.

He visited here in May, 1942.

He leaves besides his parents three sisters, Lucy, Doris, and Norma Beth at home, and the following relatives: grandparents, Mr. and Mrs. William L. Everett of Prospect, two uncles, Lawrence Everett of 329 Windsor street, Marion, and Ray Everett of 248 Pearl street, and an aunt, Mrs. Edward Johnson of near Prospect.

He visited here in May, 1942.

## Around About Marion

There's Something of Interest in Every Line

### MORMON GRUNT MEETS

Mormon song composers were discussed by Clifford M. Knudson in a fireside chat meeting of the Church of Jesus Christ of Latter-Day Saints in the home of Mr. and Mrs. E. M. Wise on Indiana avenue Sunday night. Elders Clyde Davis and Donald C. Nelson were in charge with Elder Nelson conducting. Songs written by the composers were sung and Mr. Knudson gave a summary of the Easter program for the day. An informal discussion was held on theological questions and "Winter Quarters" from the Fullness of Time recordings was played.

## GO. H STILL SECOND

## IN ATTENDANCE

Outranked Only by Coshooton Company, Officers Report.

### Word was received last night from the Regimental Headquarters at Columbus by Capt. Carl Albert, that Marion's Co. H in the Ohio State Guard is still in second place in the attendance contest, with 98.6 per cent. Captain Meredith of Co. I in Coshooton reported again with 100 per cent and Co. C at Lancaster, under Capt. Hudson, ranked third with 91.2 per cent.

### The record will be changed by the attendance at drill tonight. Two new recruits were signed last night and the replacements will help toward reaching the 100 per cent mark tonight.

### Discharge papers are available for those who are unable to attend because of working hours. All members who served during the last quarter in 1942 and the first quarter of this year should call at night at the Armory for their pay on Monday, Tuesday or Thursday.

### SHOOTING ACCIDENTAL

COLUMBUS, O., April 27.—The fatal shooting of nine-year-old Judith Van Winkle by a playmate was termed accidental by Coroner Edward E. Smith.

### SLAYER OF TWO DIES

# News Behind the News

**Patterson-Jeffers Scrap Expected to Mean Less Gasoline, Rubber for Civilians.**  
By PAUL MALLON  
WASHINGTON, April 26.—(AP)—The Patterson-Jeffers scrap is expected to mean less gasoline and rubber for civilians.  
The O.W.I. was just the usual government anti-trust suit, but it was with the O.W.I. Secretary Patterson.  
The Patterson-Jeffers controversy developed when one of Mr. Davis' young men converted a Sunday feature story on the basis of old figures from Jeffers' department, and gave them to Clark a story as to challenge the fulfillment of the whole Jeffers rubber program.  
All except one of the facts were more or less straight in the O.W.I. handout. This one, suggesting that even essential materials will be unable to get synthetic tires before September, 1943, was killed by the O.W.I. announcement when the inkblot was called to Mr. Davis' attention, and before the facts were printed in the papers.  
Mr. Jeffers could survive this critical publicity from the official government press, but whether his full program can survive Mr. Patterson's demands is still a question.  
The Army and Navy are submitting increased demands not only for gasoline but for fuel oil, and disrupting the established civilian programs. In the end, the Patterson-Jeffers argument probably will be settled by Mr. Jeffers sacrificing a portion of the machinery and valves which were to be used in synthetic rubber production for the military production of airplane gasoline.  
Must Transport Workers  
Much of the Jeffers program will not survive. In fact, it must survive, not only as a civilian requirement, but as a military necessity, because it is just as important that workers get to the factories to build planes as it is for the Army to obtain gasoline to fly them.  
No less an authority than O.W.I. substitutes this opinion in an other Sunday feature round-up on transportation, saying:  
"It is in the field of long transportation . . . getting American workers to and from their jobs . . . that the most serious war-time passenger transportation exists. . . . By the end of 1943, about four times more Americans will be going to work every day as can be carried at any one time in all available public vehicles."  
No stronger demand for gasoline and rubber for civilians has been made, even by Mr. Jeffers.  
Fuel Oil Outlook  
So also with fuel oil, which is not a part of the present controversy.  
Transportation Director Eastman has announced next winter the eastern seaboard will be getting 1,800,000 barrels of oil a day through new pipe lines and otherwise. This would be enough to

## Purging Germany's War Spirit

**WALTER LIPPMANN'S** thoughtful letter of articles last week on winning Germany away from war by assuming control of German industry had the unintended effect of making the task seem almost hopeless. Mr. Lippmann believes that if German industry is converted to peacetime products, thereby raising the standards of German living and alienating the masses from the military, the dangers, imperial bureaucracy and nationalist demagogues, the aggressive impulse of Germany can be destroyed.  
What he does not make clear—because no one can make it clear—is how to convert Germany to peacetime pursuits without another of those periods of violent readjustment leading into hopeless despair that preceded Hitler and his paranoiac appeals to revolt against the closing in of "enemies" on all sides. There is some question whether Great Britain and the United States can solve the puzzle of getting back to peacetime production smoothly themselves, and their prospect is not complicated by a tradition of reversion to militarism as the panacea for all despair.

## It's Still the Axis Powers

THE tendency to divide the opposition in the war as between Germany and Japan, considering them as separate enemies, is at the bottom of a lot of confusion about strategy. It's still the Axis powers bidding for control of the world, and their bid still is being made jointly.  
There is as much reason to believe now as there was when Japan entered the war that its action is integrated with Germany's plans. In other words, it is to Germany's advantage this spring to have Japan threatening invasion of Australia, thereby keeping shipping resources from being shifted out of the Pacific into the Atlantic and drawing off some of the aviation strength needed on the European front.  
Certainly, Japan is profiting hugely by the success of Germany's submarine warfare in the Atlantic, which makes it more difficult to supply material needed to thwart Japanese plans of consolidating its position in the Pacific. Uncomfortable as it may be to face the implications of the two-front war the United States is fighting against enemies whose strategy is correlated to create a maximum amount of difficulty, it is foolhardy to forget at this time that the war was planned this way.

## A Congressional Weakness

THE military system of promotion by seniority that loads the services with incompetents who must be uprooted periodically to keep them from doing damage works no better in congress. The only thing that keeps it from drawing fire there is the infrequency of genuine emergencies.  
However, in a recent emergency on a question of taxation congress was paralyzed to a dangerous extent by the ineptitude of the chairman of the house ways and means committee, a venerable North Carolina Democrat, Rep. Doughton, with the best intentions in the world, is qualified as chairman of the most important committee of the lower house and perhaps of congress only by the fact he has been reelected under the one-party system in his state for a third of a century.  
In fact, the one-party system in the south makes it a virtual certainty that important committee assignments will be packed with time-servers, distinguished by nothing but their years of service, wherever Democrats control congress. It is not a condition peculiar to one party (the Republicans had Sen. Borah running the foreign affairs committee) but it afflicts the Democratic party more seriously because of its southern members who can and do serve in congress for life if they like the surroundings and know how to take orders.

## Hitlerism's Silver Lining

**RAYMOND B. FOSDICK'S** report as president of Rockefeller Foundation is a strange place to find a silver lining in Hitlerism. "If Hitler had set out with benevolent intent, to build up America as the world's great mathematical center," writes President Fosdick, "he could hardly have achieved more successfully the result which his ruthlessness has accomplished. During the last year (1942) 131 leading European mathematicians have migrated to the United States. To assist Hitler in the development of America as a great mathematical center, the Rockefeller Foundation has made a number of grants over the last few years."  
The Foundation's gratitude for talent that Hitlerism excluded reflects a national gratitude that rises above the bigotry of those who, like the Nazis, would like to raise barriers of race and nationality in this country. "There appears to be a universal principle about intolerance," reports President Fosdick. "It reacts on those who practice it. Just as many countries were enriched by the Huguenot immigration that followed the revocation of the Edict of Nantes, so the United States and England have greatly profited by the scholarship driven out of central Europe through the self-defeating policy of Nazi ideology."

# Today and Tomorrow

**Secretary Hull Believed Making False Start in Trade Agreement Act Proposals.**

By WALTER LIPPMANN

**SECRETARY HULL** has persuaded the administration leaders in congress to take the position that congressional action on the trade agreements act should be made the test case of American foreign policy in the post-war world. There are excellent and compelling reasons for the extension of the act. But the efforts to initiate its importance to a point where the fate of the world hangs upon whether the act passes or not, Mr. Hull's arguments is, surely, a grave error.  
For it is not true that the vote on the amendment proposed by Senator McNary is or can be made the test of our general policy. To say that it is the test, to ask the rest of the world to regard it as the test, is to make much too much out of comparatively little and to have lost our sense of proportion. It is to make the question whether congress shall have a chance to pass on tariff schedules the crucial question of our own future and of the world's peace. This is not the crucial question, and no good can come of pretending that it is.  
Effect of Proposal  
The imprudence of posing the biggest issues on a test of this small issue is evident when we remember that if congress extends this act unamended for two or three years, no congressman is thereby committed to vote favorably on any treaty or any other measure which may come before him. But if congress amends the act—say by providing, as Senator McNary asks, that congress may within 60 days by majority vote in both houses disapprove an agreement—if Mr. Hull is "defeated" on this question, then Mr. Hull will spend the rest of the war explaining to this country and to foreign governments that congress did not really repudiate him and that he still has the power to negotiate. Mr. Hull has, in fact, asked for a vote of confidence on a question where he cannot win, in the sense that he has made sure of the future support of congress and that he can suffer no disastrous defeat.  
Moreover, by identifying the future of American foreign policy with the very subordinate question of the power of the Executive to alter tariff schedules, Mr. Hull is making it excessively difficult for himself to conduct our foreign relations. Why should the

## From News of Other Years

**TEN YEARS AGO.**  
It was Thursday, April 27, 1933. A Washington announcement reported President Roosevelt was willing to consider war debt revision after the world economic conference, but had not entered into an agreement for postponement of payments due June 15.  
A son was born to Mr. and Mrs. John Ruth of the Whistler road in Richmond township.  
Four hundred exhibits were on display at the Marion Y. M. C. A. as its fifth annual hobby show opened. The event was to continue through Saturday.  
Young people from Sycamore, Bucyrus, Galien, West Mansfield, Cardington, Hepburn and North Robinson United Brethren churches attended a district rally in First U. B. church in Marion.  
Misses Olla and Floretta Allmendinger were hostesses at a dinner in their home on West Church street that marked the close of the program season for the Bay View club.  
The L. of W. M. club met at the home of Mrs. Doris Shindler on Windsor street.  
Mrs. W. V. Metz of Davis street was hostess to the H and T club.  
Mrs. John Higgins was hostess to the L. M. club at her home on Forest street.  
Miss Mabel Wheatley was speaker when the Art club met at the Marion City Library.  
Mrs. Arthur S. Zachman of Toledo was visiting her mother, Mrs. G. H. Morrow of South Prospect street, and other relatives.  
Dr. H. B. Williams, president of Bowling Green university, spoke in commencement exercises at Morral High school. The graduates were Arlene Branch, Rowena Moore, Vera Murphy, Florence Seyle, Rosina Starnes, Helen Swales, Kenneth Williams, Allen Ferguson, Ralph Wiley, Paul Brown, Dever Lucas, William Steen, Harold Garwood, Lester Butcher, Robert Newland and Wilbur McWhorter.

## TWENTY YEARS AGO.

It was Friday, April 27, 1923. Twelve persons were killed and 20 injured in a tenement house fire in New York city.  
A report from Washington stated that President Harding was convinced the threatened split in the Republican party over his World Court proposal had dwindled down to opposition of a handful of "irreconcilables" and that the success of the administration program was virtually assured.  
Governor Donahue called for adoption of a uniform state code for governing municipal courts and said he would not approve establishment of any more courts until such regulations were put into effect.  
A son was born to Mr. and Mrs. J. M. Grace of Mt. Vernon avenue. A daughter was born to Mr. and Mrs. Kenneth Albert of near Green Camp.  
John Stetter of Huntington, Ind., formerly of Marion, who had been an Erie railroad conductor about 60 years, was killed in a train accident near Lima.  
A son was born to Mr. and Mrs. A. H. Schraush of Detroit, formerly of Marion.  
Peter Navin, 88, died at the home of his son, James A. Navin, five miles west of Marion.

## World War a Year Ago

By The United Press  
**APRIL 27, 1942**  
President Roosevelt sends message to congress outlining 7-point anti-inflation program.  
British RAF bombard German Baltic port of Rostock for fourth successive night.  
U. S. Navy announces destroyer Sturtevant sunk off Florida April 26, either by a submarine or an American mine.  
Washington announces command of all forces of the United Nations in Iceland taken over by Maj. Gen. Charles H. Bonesteel.  
Maj. Gen. A. McEl. Patch, Jr., named in charge of U. S. troops in New Caledonia.  
Japanese forces penetrate within 67 miles of the Burma Road terminus at Lashio.  
Most fresh vegetables consist of about 90 per cent water.

## —And Speaking of Food

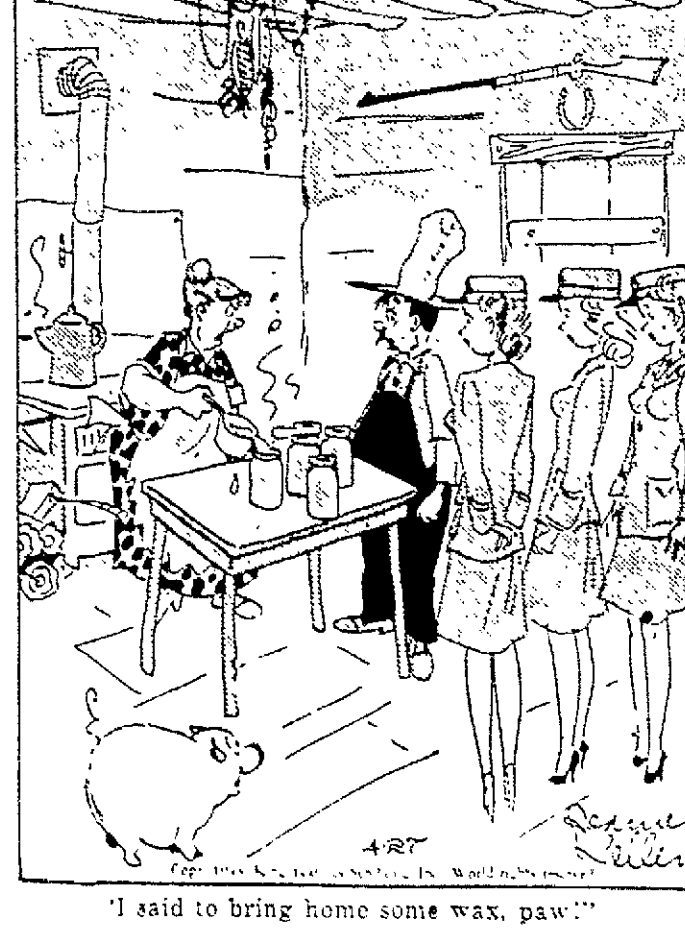

**From Business Week.**  
THE Magic valley of Texas was just another expanse of cactus wilderness when the last war began. Now, with the supply of food for the fighting and home fronts again a problem of growing dimensions, that four-county area along the Rio Grande is making a vital contribution.  
From its 460,000 fertile, irrigated acres, the Magic valley this year will dispatch 75,000 cars of fruits and vegetables, 150,000 bales of cotton, and vast quantities of grain sorghums, corn, flaxseed, alfalfa, and cereal grasses to the fighting fronts and the home front.  
The valley doesn't stop at growing the crops. It is dotted with canning and processing plants. And in common with other progressive sections of the state, the valley is not passing up any bet on the future of dehydration.  
The extensive system of irrigation canals, of course, is the secret of the Magic valley's success story. But it has been an open secret for four centuries. Early Spanish adventures in that area found that Indian tribes had diverted water from the river into their fields with crude earthen dams. Far enough south to escape heavy frosts, the land, which lies principally in Hidalgo, Cameron, Willacy, and Starr counties yielded abundant crops of corn and beans for the Indians.  
It remained for a midwesterner, John H. Shary, to make this big gamble that started the boom. In 1915 Shary set out 330 acres of citrus trees. By 1921, when he began to collect in big luscious fruit, land was selling in tens of thousands of acres for prices that ranged up to \$1,000 an acre. It was a realtor's paradise.  
Brownsville, mushroomed around the site of Fort Brown where the army set up its defenses at the mouth of the river during the war with Mexico in 1848, is the principal city and cultural center of the valley. Its harbor and turning basin at the end of a 17-mile ship canal accommodating ocean vessels of 26-foot draft are a natural hub for the rapidly growing valley communities of McAllen, Harlingen, San Benito, Edinburg, Weslaco, Mission, Rio Grande and Raymondville.  
EACH of these towns has its vegetable canning, fruit processing, or dehydration plants. Quaker Oats Co., in collaboration with Cerophyl Laboratories, operates a modern, highly specialized dehydration plant to prepare cereal grasses—oats, rice, barley—for health foods. Universal Cereals

## Do You Know

Bison herds in the United States totalled about 60 million head before the coming of white men.  
A paper mesh bag that will hold 300 pounds has been developed to replace burlap in transporting wool.  
Specimens of leather tanned by the ancient Egyptians have been preserved to the present day.  
A person is taller when he awakens in the morning than when he goes to bed at night.  
Streamlined plastic tableware is used by the U. S. Navy, featuring non-slip and non-drip cups and saucers.

## Daily Bible Thought

God looks through all posing and subterfuge. Be genuine. "Man looketh on the outward appearance, but God looketh on the heart."—1 Samuel 16:7.

## So They Say—

I believe that the granting of vacations to industrial workers this year will be helpful in war production. Experience has shown that the volume of production is increased if the workers can restore their energies through periods of relaxation.—WPB Chairman Donald M. Nelson.  
We have fostered the idea and the practice of a community of good neighbors. The international law to which we submit ourselves is not an international law of the Americans alone but is the law of civilized nations everywhere.—Secretary of State Cordell Hull.  
There are lots of lives being lost in the army because of the accumulation of fatigue and the lack of endurance and strength. Army cannot be developed in the short term of army gives. It must be developed during the formative years in school.—Col. Thomas Banks of war department athletic branch.  
We are outnumbered and I don't like being outnumbered. They (the Japs) have got all airplanes around these parts for combat. Lieut. Gen. George C. Kenney, allied air force commander in south Pacific.  
I warn you that Australia is in danger. The danger—in the islands along our northern coast. There looms an impending menace. A great onslaught.—Australian Air Marshal Sir Drakeford.  
Rationing Ends Hobby  
Associated Press Features.  
CHATTANOOGA, Tenn.—Point rationing of food meant a little more to Dr. Irvine Chatanooga research chemist, than to most other people. It put an abrupt end to one of his many hobbies.  
A chemist of national repute who turned back on lucrative commercial offers to a faculty position at the University of Chattanooga for the pure love of teaching, Dr. Grover Chatanooga collected unusual food products as much for a hobby as for consumption.  
He has been known to give complete sets of exotic foods from cans and one from a tin of being a magician because he always produce a can of any food men from his wellstocked shelves.  
Now that ration points mean provisions for everyday foods, the professor has emptied shelves of foreign delicacies and turned his attention to other avocations.  
For instance, there is his collection of Victorian paper weights, or the number of volumes of Henry, or his collection of 16th and 17th century tomes on herbs and animals.  
He has a complete laboratory—4,000 chemicals are neatly catalogued there—where he dabbles less frequently now, in research work for local commercial firms or in crime detection work.  
He has been asked several patents on chemical processes and the like, but a genuine puzzlement will overtake him if you ask him how many. He actually doesn't know.

# Hire New Golf Pro for Country Club

Andy K. Dewar Comes Here From Reeds, Minn.; Replaces Schimmel.

Andy K. Dewar of Reeds, Minn., has been chosen as the new Marion Country club golf pro, succeeding William (Bill) Schimmel, who has transferred to war work at the Universal Corder Corp.

Dewar, 39, was selected from a list of 14 pro nominees by the Country club board of directors, of which R. T. Lewis is president. Dewar has accepted and will report at the club around May 1 to assume his new duties. He has served in the dual capacity of pro and manager of the Waseca Lakeside club at Reeds for the past eight years and comes to the Marion course highly recommended by Waseca club members.

One of Dewar's foremost qualifications for the Country club post is his ability as a golfing teacher. In his eight-year stay at the Minnesota club, golfers there benefited from his instructions and consequently have recommended him to Marion linksmen as a most capable teacher.

Dewar is married and has a 14-year-old daughter. He and his family will live at the course club house this summer.

Because of Easter Sunday observances, week-end golf play at the Country club will be small. Only a few "divot-diggers" toured the course Saturday and Sunday. However, over the previous week-end some 40 or 50 golfers turned out for pre-season tune-ups. The club season will open sometime between May 5 and 15.

## COOPERATIVE GARDEN PLAN ANNOUNCED

Country club members will be doing their share toward solving the nation's food shortage problem this summer. Plans have been made for a club victory garden that will be run on a cooperative plan. Notices have been sent out by club President R. T.

## FIGHTS LAST NIGHT

By The Associated Press  
PROVIDENCE, R. I., April 26.—Tony Costa, 123½, Woodstock, R. I., outpointed Jackie Callahan, 127½, Hamilton, Ont. (10).  
PITTSBURGH—Willie Penn, 125, Hartford, Conn., outpointed Jackie Wilson, 127, Pittsburgh (10).  
PHILADELPHIA—Johnny Hutchinson, 124½, Philadelphia, outpointed Bobby Ruffin, 122, New York (10).  
HOUSTON, Texas.—Al Johnson, 140, New Orleans, outpointed Benji (Gacy) Robinson, 147, New York (10).  
BOSTON.—Sonny Horne, 137½, Niles, O., and Larry Pacino, 135½, Boston, drew (10).  
CHICAGO—Joe Maxin, 133, Cleveland, outpointed Al Jordan, 136½, Kansas City (10).  
NEWARK—Curly L. Sheppard, 135½, Pittsburgh, knocked out Phil Conway, 170, Newark and U. S. Army (10).

## Ohio State Rallyes To Beat Ohio U, 5-4

By The Associated Press  
ATHENS, O., April 27.—Ohio State university's baseballers staged a belated rally to defeat Ohio university 5 to 4 here yesterday. Trailing by four runs, Ohio State tied the score in the seventh frame and counted the game-winning marker in the eighth. In another Ohio college baseball game yesterday, Kent State defeated Wooster 3 to 1 at Kent.

## VETERAN UMPIRE DIES

By The Associated Press  
ST. THOMAS, Ont., April 27.—Robert D. Embley, for 34 years a National league umpire, died at his home early today after a long illness. Embley was 84. Born at Guelph, Ont., Embley started his baseball career as a pitcher for the Harrison, Ont., Browns in 1878. He drifted into umpiring by chance in 1887 when he was called on to umpire an International league game. Three years later he joined the National league staff and became one of baseball's most famous umpires before retiring in 1924. The last two years he acted in an advisory capacity to President Heydler.

## NEW ATTENDANCE TEST FOR BASEBALL IN SECOND OPENERS

Turnout at Games So Far Anything But Pleasing to Club Owners.

By The Associated Press

The major leagues will undergo another attendance test from baseball fans, or vice versa, today as the National and American leagues present their "second openers," the home debuts of the clubs which have been on the road since the start of the season.

Advance estimates were that about 80,000 fans would turn out for the eight games and if the predictions are fulfilled baseball not only will have its biggest day of the spring, but will have a load lifted off its collective mind.

The schedule and the expected attendance:  
National league—Boston at New York 15,000; Cincinnati at Pittsburgh 15,000; Chicago at St. Louis 10,000; Brooklyn at Philadelphia 7,000.

American league—St. Louis at Detroit 25,000; New York at Boston 10,000; Cleveland at Chicago 5,000; Philadelphia at Washington 4,000.

Up till now attendance at games has been far below expectations. The approximate total turnout for 27 ball games (doubleheaders counted as one of course) has been 248,000 divided 128,400 in the

## War Curtails Golf in Ohio

By FRITZ HOWELL, Associated Press Sports Writer

COLUMBUS, O., April 27.—Ohio's competitive golf schedule for 1943 felt the full impact of the war today as a check-up showed that only one of the dozen annual fixtures was certain to be staged.

Six tournaments were announced as definitely off three others as "probably suspended" and two others were in the air.

Based on the program were the state annual 15,000 Inverness four-ball matches at Toledo, in which 16 of the country's top-flight professionals competed each year, the third annual 1,000 Mahoning Valley open at Youngstown, which has attracted the best of the "play for pay" contingent; the state public links championships for both men and women; the Ohio conference and the state inter-collegiate contests.

## Board Member Opposed

Dr. J. G. Love, board of governors member of the Ohio Golf association, said the board was being pulled as to the possibility of holding that group's state amateur, seniors and juniors tournaments.

"I am practically certain, from conversations I've had with other board members, that all three tournaments will be declared off for the duration," Dr. Love said. "I'm casting my vote against holding them."

Still on the tentative list are the women's state championship event, and the annual Ohio open, the latter sponsored by the Ohio section of the P. G. A. Officials of each association said their tournaments "had not been called off yet," but that they thought they might be.

That leaves only the state high school championships, scheduled May 21-22 at Ohio State university's course, among the competitive certainties on the Buckeye courses this year.

## Professionals Curtailed

The Inverness and Mahoning valley fixtures were erased by the action of the national govern-

## Mickey Cochrane Finds Big Leaguers on Navy Squad List

GREAT LAKES, Ill., April 26.—Lt. Gordon S. (Mickey) Cochrane, naval officer at Great Lakes Naval Training center, said today he expects the call of the 1943 season Sunday against the Colonels in Louisville. He confident that another season of baseball can be carried on to the championship of the nation's armed forces.

At 46, Lt. Cochrane is enjoying the finest health of his life in his second year in service. He was commissioned a lieutenant, grade 1, in March, 1942. Lt. Cochrane cruised through his aviation course, then spent the summer leading the Bluejackets to 63 victories in 77 games and the championship of American service teams.

In the fall, Lt. Cochrane was appointed as a battalion commander in the recruit training division, but in his spare hours served as an assistant to Lt. E. D. (Tony) Hinkle, coach of the Bluejackets' football squad.

## Reds in Pittsburgh To Open Bucs Season

By The Associated Press  
PITTSBURGH, April 27.—Ray Starr and Bob Klinger are the pitchers as the Cincinnati Reds help the Pittsburgh Pirates open their home season today, and Ray is content that the Pirates have no 1942 balls left over and must use the 1943 baseballs.

Ray, for all his 35 years, thinks he could be a 20-game winner with the dead ball. Since 20 dozen 1942 models are being pressed to the team, Ray will have to get along the best he can. Gerald Walker will be the Reds' regular center fielder now that Mike McCormick has gone home before being inducted.

## 80 PER CENT IN WAR EFFORT

CHICAGO—President Ed Dudley of the Professional Golfers' association of America believes that from 80 to 95 per cent of all golf club members in the United States are in the service, war production, Red Cross or other similar war relief societies.

## "WHAT'S COOKIN'... IN AKRON?"

JUST talked by phone with Bill O'Neil, President of General Tire in Akron... wanted to find out what's going on... the latest developments.

And, there's plenty cookin'. Yes sir, plenty.

Wish we could tell you all about it now... but there's no blackout in the laboratories of The General Tire & Rubber Company. The lights burn late.

Chemists, engineers, designers, testers are hard at work against the time when they can give us a brand new kind of Top-Quality General Tire to give you.

You've heard of Guayule, that shrub which gives real rubber, the large scale domestic growth of which was sponsored by General's President O'Neil.

You've heard of the new synthetic rubber factory, soon to start operation in Texas under General Tire.

You've heard of what wide use of rayon and nylon may do to tire construction.

Well, put these all together and then dream and scheme along with General's technicians. When that General Tire of the Future is here, we're going to be as happy to sell it as you will be to ride on it. We can tell you that much.

Seeing them so hard at work in Akron is going to make us work just that much harder to keep you going with recapping done by our skilled mechanics (right in our own shop) or with new tires on your certificates. Doing it will help to bring "tomorrow's General" just that much closer.

*Dallas Harruff*

NOW YOU MAY BE ELIGIBLE TO BUY A PRE-WAR TOP-QUALITY GENERAL TIRE  
Rationing rules were further relaxed April 1. Don't guess about eligibility. See us. Get the finest quality you can.

## BIVINS HAILED AS DURATION CHAMP

Under Whips Valentino in Decisive Manner.

By The Associated Press  
SAN FRANCISCO, April 27.—Line Jimmy Bivins, hard-hitting Pat Valentino, was the decisive champion in a prize fight which was the most important of the season.

Franking heavy now on Joe Louis and Billy Fox, out of circulation, crowd of 7,500 a fancy network and in-fight-out-pointed the Coast Guardman.

During the first and second rounds, Bivins scored with an effective left and in the tenth round, Valentino was knocked out by a right hand.

## OUTLINE PLANS FOR BLACKOUT

Civilian Defense Push Preparations for Darkening of 9 Counties Next Month.

Plans for the nine-county blackout to be started soon were discussed at a meeting of the city control center service chiefs of the Marion Civilian Defense Council Monday night at the control center building on North State street.

One of the most important and immediate steps in the pre-blackout program is taking of the official oath of Civilian Defense, pledging the faithful discharge of duties as a member of a corps, by each and every member of the civilian defense personnel in the city.

This must be done by the end of this week. Each service chief, before leaving the meeting, supplied himself with copies of the pledge which he will distribute to his group. The groups will be sworn in at a time most convenient to them. Workers who have not yet been fingerprinted should get in touch with the chief of their particular service for definite instructions where and when to be fingerprinted.

The purpose of taking the oath of Civilian Defense is twofold, first as a pledge of allegiance to the country and second as documentary evidence, it was pointed out.

Pennants to be used on all civilian defense cars during the blackout were distributed. All cars authorized to operate during the blackout will be identified with a Civilian Defense pennant to be displayed on the left and front of the car. Each pennant is registered and the registration is on file at the police department.

Plans were discussed as to methods to be used in signaling during the blackout. A definite setup will be announced when these plans are completed.

W. E. O'Connell, assistant coordinator, presided for the meeting which was attended by representatives of the fire department, police department, medical emergency group, repair squad group, demolition squad, utility chief and chief air raid warden.

Father Kills 2 Girls, Then Shoots Himself

By The Associated Press  
BAY CITY, Mich., April 27.—Barricaded in his home and despite efforts of police to oust him with tear gas, the father of six children went berserk with a shotgun this morning, killed two small daughters, wounded two others, and then shot himself fatally through the head.

While police fired tear gas into the home after vain efforts to calm the man, Cecil J. Lisk, 44, turned a shotgun on his daughters in an upstairs bedroom and then dashed into the basement and shot himself.

Police reported that the father of six children went berserk with a shotgun this morning, killed two small daughters, wounded two others, and then shot himself fatally through the head.

While police fired tear gas into the home after vain efforts to calm the man, Cecil J. Lisk, 44, turned a shotgun on his daughters in an upstairs bedroom and then dashed into the basement and shot himself.

## GIRL SCOUTS HEAR PROGRESS REPORT

Leaders Told Membership Has Been Doubled in 5 Years.

The annual achievement record from national headquarters, read by Miss Edith Trent, executive secretary, at a meeting of the Girl Scout council Monday night at Girl Scout headquarters on West Center street stated that the membership in Marion had been doubled in five years.

Mrs. J. E. Oliphant gave the treasurer's report, and the executive report was given by Miss Edith Trent. Miss Esther Eggleston reported on the Leader's Association, and the camp committee report was given by Mrs. E. E. Holt.

Mrs. Fillmore Young gave a report on the cookie committee and Mrs. J. W. Wiant reported that the program committee is preparing to aid the leaders in homemaking, wining, arts and crafts and folk dancing and singing programs. Besides the day camp, they have also planned archery and gardening for summer activities. The training committee report was given by Miss Elma Houser, and Miss Edith Trent reported on the troop development committee in the absence of Mrs. J. E. Frey.

Policies pertaining to public appearance of Girl Scouts, ordering badges and equipment, adults having camp licensing courses before being qualified to take troops on overnight camping trips, and declaring that girls under the sixth grade are too young for advanced camping experiences such as overnight camping, were submitted by the policy committee and accepted.

Miss Esther Eggleston reported on the Area Girl Scout meeting at Mansfield. She announced that the OCD office in Washington has said that the best way for Girl Scouts to help in civilian war work is to increase their membership, and by so doing they can aid in alleviating juvenile problems.

BISHOP VISITS WINANT

By The Associated Press  
LONDON, April 27.—Methodist Bishop Adna W. Leonard, visiting United States service groups overseas as the representative of 31 Protestant organizations, conferred today with U. S. Ambassador John G. Winant and lunch with Brendan Bracken, British minister of information.

GUARDSMAN'S BODY FOUND

WATERTOWN, N. Y., April 27.—A body, identified by Oswego Coast Guardsmen as that of Coast Guardsman Ralph J. Sprau, 42, of Sandusky, O., was found in Black river bay, Lake Ontario, yesterday. Sprau was one of six Coast Guardsmen drowned when their boat capsized in Oswego Harbor last Dec. 4.

## More Than 50 U. S. Mines Now Closed in Pay Dispute

Possibility Seen Production of Coal Will Be Halted in U. S. by Saturday.

By The Associated Press  
WASHINGTON, April 27.—More than 50 mines were shut down today in the spread of a strike today, with the possibility of halting production of soft coal by Saturday.

The war labor board appealed to the miners' patriotism not to walk out, saying in messages to President John L. Lewis of the United Mine Workers and other UMW leaders that "a nation at war" needs uninterrupted production.

However, in Pennsylvania 26 mines were shut down with 14,708 men idle. The production loss there thus increased to more than \$5,000 tons a day, on the basis of six tons a man.

About 4,000 men were idle in Kentucky and 7,500 in Alabama. In Ohio, a UMW district president said "If there is not a contract between operators and the union by Friday there won't be any coal miners go into coal mines Saturday."

UMW district leaders met in New York to plan a meeting but Lewis still was silent. He has flatly opposed the turning over of the wage dispute between miners and the operators to the WLB.

No Strikes Authorized

Although UMW spokesmen said no strikes had been authorized, they pointed out Lewis had not forbidden them, and the number of idle miners was estimated at more than 13,000 in the Pittsburgh and Birmingham areas.

In addition, a New York source said hundreds of telegrams were arriving at UMW headquarters, urging the union's negotiators to stand firm and informing them that miners were ready to strike at a moment's notice.

Most of the Pittsburgh and Birmingham operations are captive mines whose total output is used by the steel companies that own them. At least two commercial mines in Pennsylvania, however, were hit by walkouts, and several thousand southeastern Kentucky coal miners quit work while elsewhere in the state those who continued work were described by both operators and union leaders as "restless."

Bituminous operators in Alabama, Illinois and Indiana have received notice the miners will not work after midnight Friday. The board announced a panel

tables, which are one of the WMC aids designed to "help the employer help himself," in meeting the problems that are certain to come as the armed forces drain away many of the nation's workers. Mr. Hootnistr declared. He emphasized that employers not now faced by serious employment problems should realize that such difficulties are on the way, and advised all employers to decide now how they are going to meet the problem when it comes.

Draft Replacements

Winding up the morning session, Col. F. C. Spencer of Columbus, occupational advisor for selective service in Ohio, told the group about the replacement schedule plan offered by the U. S. selective service to employers as a means of eliminating "surprises" in the drafting of key factory workers. Col. Spencer explained employers who have a number of workers subject to the draft may work out a six-month schedule, setting up the order in which he can best spare the men from their jobs. This schedule is then sent to the state selective service headquarters and, if approved, is sent back to local draft boards.

Through the use of this plan, the employer can retain longest the workers hardest to replace, giving the employer several months in which to train replacements for those in highly skilled jobs. Use of the schedules permits an orderly withdrawal of workers who must go into military service, he explained.

Some employers are making use of the schedules, but selective service officials wish thousands more would use them because they clear the way for drafting of workers with a minimum of disruption of production, he said.

Panel discussions and short talks this afternoon were to conclude the two-day conference.

ERROR IS ADMITTED

By The Associated Press  
CHICAGO, April 27.—The Encyclopedia Britannica, which in 1768 termed dying a "childish invention," celebrated its 175th birthday today with the knowledge that its nearly two-century old definition was in a spin.

Cardington Native Dies at Home in Crestline

By The Associated Press  
CRESTLINE, April 27.—Charles Curtis Bröller, 67, died at his home here Tuesday. He was born in Cardington. For 22 years he was employed by the Pennsylvania railroad but since 1922 has been an insurance agent.

Funeral services will be held in the Robert F. Beck funeral home at 2 p. m. Friday. Rev. W. M. Swartz of the First Presbyterian church will officiate. Burial will be in Greenlawn cemetery.

In one molecule of human blood pigment there are 16,666 atoms.

# Pitfalls of Love

By ADELE GARRISON

THE VOLLEY found its mark. The book my word that you could not have done anything of the kind. Katherine never knew my brother's face and she noted the mounting fury in his eyes.

"What?" he shouted. "She dared?" Then he sank back in his chair and forced his voice to a sinister monotone.

"You suddenly have a right to tell me, Margaret," he said. "Will you please get on with it, something no detail?"

"Gladly," I said, "if you will promise not to interrupt."

He gripped the arms of his chair and nodded assent. "Go ahead," he said.

I began with the Merediths, all up in me and his story of Ruth Hayes' vicious attempt to blackmail himself and Katherine. It had failed to persuade her to give him information of her whereabouts.

Enraged at Ruth Hayes

Jack grew whiter, if possible, as I talked but kept his promise to make no comment until I finished. When I finally told him that Ruth was to appear at Hay's office the next day, and that my father would then act to draw her funds and make her powerless for further harm, he caught his breath sharply, then exclaimed in sudden fury.

"The lying beast!" he said. "Did Katherine believe I had done this—had started divorce proceedings against her? Of course Meredith probably believed it. He knows nothing about me except my record as the worst husband in the world."

"That didn't know," I said, "and

"There is but one thing to do now, I told him firmly. 'I am going to get Katherine, if my father gives me the permission, and bring her down here. Then you can talk to her as you wish.'"

"I refused with equal force. 'I am at the end of my patience with you, Jack. You are a liar and a traitor. This book was here while I call the police, get her permission for the money, and make arrangements for getting hold of Katherine.'"

"I said my word as I started for the door.

"You can't do this to me, Margaret," he said savagely. "Do you think I will let Katherine see me like this? And with his free hand he gestured to his hair and beard with a look of intense disgust.

His cry of protest and haunted eyes stopped me more effectively than his clutching hand on my arm. He had advanced the one argument which would appeal to a woman—his horror of letting Katherine see him in his present unshaven and unshorn disguise, after so long an absence from her.

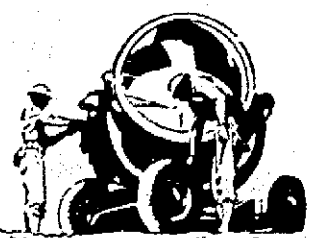

I think he saw my wavering in my eyes, for he spoke again, imploringly.

"I can't see her like this, Margaret. Don't you see? I can't do it. I'd rather die."

## What You Buy With WAR BONDS

Floodlight the Skies

Searchlights of 2-million candle power. That's as much candle power in one searchlight as is required to floodlight four major league ball parks, or to illuminate 20,000 American homes. These anti-aircraft searchlights cost \$27,500.

They are for your protection too, as they sweep the skies for enemy planes. And they are for the protection of lives everywhere as they flash high into the heavens with their brilliant light. Your War Bond purchases help pay for them. Our anti-aircraft fighters need them. They give their lives—you lend your money." U. S. Treasury Department

## American Invites All Comers To His Slit Trench

By HAROLD V. BOYLE

Associated Press Correspondent

WITH U. S. FORCES NORTH-EAST OF BEJA, April 23 — (Delayed) — One of the most popular slit trenches in north Tunisia today was a shelter dug in a hillside under a German artillery bombardment by Pst. James H. Foote, 21, of Delaware, Pa., who obligingly shared it with all comers.

It bordered a path leading to one of the forward American artillery observation posts which was under heavy fire. Every time an enemy shell plopped in the vicinity some military wayfarer popped headlong into Foote's slit trench.

"Come in," he said unnecessarily to one visitor who dived in so quickly that he came up with a mouthful of black loam.

"I've had all kinds of people in here today, but you're the first newspaper correspondent. What kind of news do you expect to find in a slit trench anyway? Nothing interesting ever happened in slit trenches. Take it from me. I know. I've been in this position six days and nothing ever comes by this place but shells, shells, shells."

"We get a barrage every day, but sometimes it lasts only five or ten minutes, like today. On a day like that a man can get out of here for a stretch."

"During the last barrage I had a colonel in here with me and a British major was in the next slit trench. It kinda breaks the monotony when guys drop in that way."

"You get to learn things talking to them. By the way, what are our fellows doing in the Pacific?"

Pvt. Herbert Adery of Steubenville, was one of the soldiers waiting out the German fire in other slit trenches in the area.

"I don't know," he said, "and

## YOUR HEALTH

By LOGAN CLENDENING, M. D.

### Quinine Supply

Malaria is still the great worldwide killer. This may seem strange to those of my readers who live in the middle and Northern part of North America, but in our southern states and in nearly every part of the world where our boys are fighting, it is rampant and far from a minor malady.

Quinine is still, also, the sovereign remedy for malaria, reports to the contrary about atabrine notwithstanding.

Before Pearl Harbor the Dutch on the island of Java controlled the world supply of quinine. Pears have been expressed that since the Japanese conquest of Java our supply of quinine is in danger of running out and our troops in tropical and semi-tropical countries will suffer the pangs of malaria without a cure.

These fears are without foundation. In the first place there is an enormous supply of quinine in storage for the armed forces.

Also an adequate supply for the civil population of the United States for several years.

Various companies have begun the cultivation of cinchona trees, from the bark of which quinine is derived, in Bolivia and Guatemala. South and Central America was the original home of the cinchona tree. The tree takes 15 years to mature to the place where the bark is productive of quinine, and these Guatemalan trees will begin to bear about six years hence.

Quinine has also been cultivated in India. The product is known as totaquinine (tota, because it contains all the alkaloids), and while the Indian product is not nearly as good as the Java product, it will serve, and requires only a higher dosage to make it effective.

The Russians have begun cultivating Indian cinchona plants in the Caucasus.

The fear that the Japanese, in a fit of destructiveness in the event of being forced to abandon Java, will burn the quinine forests is also unwarranted. There is nearly continuous rain in that region; to burn them would be impossible. And since there are 50,000 acres or more of these forests, to cut them down is equally impossible in any short time.

The Dutch botanists have developed one of the most highly specialized agricultural projects on earth in their cinchona plantations. They have bred and cultivated their trees so that they get 8 to 10 per cent quinine out of the bark, whereas the British in India get only 2 per cent and the Central American bark yields even less.

This farming takes long-range planning. The crop matures only once in 15 years, and after the tree is stripped it is afterwards useless. So every year one forest must be destroyed and a new one planted. The seeds of the cinchona tree are so small that it takes about 40,000 to make a gram. The Dutch have taught Javanese girls to distinguish the seeds with embryos. They sit at a table, the top of which is ground glass, illuminated from below, and brush the little seeds into a pile with a feather, separating them from the useless ones.
